

# It is the Little things that make a Big Difference

The colourful dress may change our mind with good thoughts. For example every doors will open for the good dresses.

To take care of your special and costly dresses, we introduced the '**GELWASH**', especially for **Ladies to reduce their work load.** **GELWASH** is based on **Nano Technology of Singapore.**

<i><b>Gelwash</b></i>	<i><b>Soap, Powder</b></i>
Neutral P <sup>H</sup> Organic base	Alkali P <sup>H</sup> _ Because of Caustic Soda
Neutral P <sup>H</sup> means it is 100% safe for skin, cloth and machine.	Alkali P <sup>H</sup> means it is liable to erode skin, cloth and machine too and so likely to affect them.
Same amount of Liquid is requisite for all Front, TopLoad Machines	Different amounts of powder at the different prices are the common norms for Front and Top Load Machines.
No Foam. No effect on incessant working of Machines	100% Foam producing products. Certainly machines will not work instantly.
No need of brushing up or wash with hands. Work Free.	Second wash with brush & Hand is unavoidable. Labor Loss. Time Loss.
Minimum use of Water, Electricity, Money	Much More consumption of water, electricity and Money, too.

**Why Not Stay away from Negative Influences?**

## Method of Usage

### In Machine :

Take limited amount of water in machine. Pour 20 ml of Gel Wash ( One capful of bottle) in to the water and dip 10 to 12 cloths in to it. Soak the cloths for 30 minutes. Then Wash it using the Machine [Semi Automatic]

Pour 20 ml of Gel Wash liquid into the Powder drawer of the Machine and wash the clothes in the usual way [Fully Automatic Machine]

### Hand Wash

Pour 20 ml of Gel Wash liquid in half bucketful of water (8-10 litres) and soak 10 -12 cloths for 1 to 1½ Hours. Then brush up the cloths gently and wash it off with fresh water.

*Note: Don't use Detergent or soap and Dettol while washing with Gel Wash.*
